## PROFESSIONAL SUMMARY

Software Developer with 1 year of professional experience working with **Java, Spring Boot, REST APIs, SQL, and React.js**. Experienced in developing layered backend applications, integrating REST APIs with frontend interfaces, and working with **Spring Data JPA, Hibernate, Spring Security, and JWT-based authentication**. Strong foundation in OOP, MVC, database design, API development, and web application development, with an interest in building maintainable and secure software systems.

## TECHNICAL SKILLS

**Languages:** Java 17, SQL, JavaScript , HTML5, CSS3

**Backend:** Spring Boot, Spring MVC, Spring Data JPA, Hibernate, Spring Security, JWT, RESTful APIs

**Frontend:** React.js, React Hooks, Axios, Bootstrap

**Databases:** PostgreSQL, MySQL, MongoDB

**Tools:** Git, GitHub, Maven, Postman, Swagger/OpenAPI, Docker, Spring Tool Suite, VS Code

**Concepts:** OOP, MVC, Layered Architecture, DTOs, Bean Validation, Exception Handling, Pagination, RBAC, DSA

## PROFESSIONAL EXPERIENCE

**Software Developer (Full Stack)** *Aug 2025 – Aug 2026*
*Devlinxs* *Tirupattur, India*

- Developed backend features using **Java 17 and Spring Boot**, building RESTful APIs with a layered architecture consisting of controllers, services, repositories, and database entities.
- Implemented API authentication and authorization using **Spring Security and JWT**, including role-based access control for protected application resources.
- Developed database access and persistence using **Spring Data JPA and Hibernate**, working with entity relationships, repository queries, and pagination for application data.
- Implemented **centralized exception handling** using `@ControllerAdvice` and structured API error responses to provide consistent behavior across REST endpoints.
- Built and integrated **React.js** components with backend REST APIs using Axios, managing component state, asynchronous requests, loading states, and API errors.

## TECHNICAL PROJECTS

**Gather (Event-Sharing Platform)** Live Demo | GitHub Repository *React.js · Spring Boot · PostgreSQL · Razorpay*

- Developed a full-stack **pay-per-event platform** allowing organizers to create and publish personalized event spaces (schedules, venues, gallery) accessible to guests via unique URLs and QR codes without account creation.
- Integrated **Razorpay Payment Gateway and Webhooks** with HMAC SHA-256 signature verification to handle secure pay-per-publish transactions and credit-based workflows.
- Engineered a layered backend using **Spring Boot 3, Spring Data JPA, and PostgreSQL**, implementing JWT authentication, OTP verification via JavaMailSender, and multi-part media uploads.
- Built responsive organizer and guest interfaces in **React.js**, featuring RSVP tracking, announcements, downloadable QR codes, and formatted WhatsApp invitation generators.

**InventoryFlow (Full-Stack Web App)** GitHub Repository *React.js · REST APIs · MongoDB*

- Developed an admin-focused inventory management dashboard using **React.js**, with reusable components and hooks for inventory, orders, reports, and business data management.
- Integrated REST APIs using **Axios** for asynchronous data retrieval and updates, with client-side handling for loading, error, and empty states.

## EDUCATION

**Master of Computer Applications (MCA)** *Aug 2023 – May 2025*
*Sacred Heart College, Tirupattur*

**PG Diploma in Cyber Security (PGDCS)** *Aug 2024 – May 2025*
*Sacred Heart College, Tirupattur*

**Bachelor of Computer Science (B.Sc CS)** *Jun 2020 – Apr 2023*
*Islamiah College, Vaniyambadi*

## PUBLICATIONS & CERTIFICATIONS

- **Publication:** *A Comparative Study of AI Techniques in Gaming: Top-down vs Bottom-up Approach.* IJCRT, Vol. 13, Issue 2, 2025.
- **Certifications:** Postman API Fundamentals (2025) | SQL Intermediate (SoloLearn) | Python for Data Science (NPTEL)
